\* **“SOS Planet”** is aimed at implementing the most effective actions to turn our world net CO2 neutral asap.

These actions consist in collecting opinion polls in the 10 major European countries on what Europeans think about turning their countries net CO2 neutral by 2030 (89% of the 1000 Italians interviewed were in favour <http://www.eliminareglisprechi.it/web/news/#sondaggi>) and, in a second moment, in publishing them on the most important newspapers in the 5 most important European countries with appeals to European leaders, local Governments, and Parliaments to legislate according to the outcome of the opinion polls or to call referendums.
